
MODULE

Module Title: Construction Industry Development
Module Code: BCPM0008
Module Leader: Dr. Kumar Aniket
Academic Year: 2022/23

Module Details

Module Title:	Construction Industry Development
Module Code:	BCPM0008
Assessment Method	Term paper (100% of the final grade) <i>1000 word term paper based on course material covered in the course</i>

Module Leader Information

Name:	Dr. Kumar Aniket
Email Address:	k.aniket@ucl.ac.uk
Website:	http://aniket.co.uk/pages/condev.php
Office:	Room 244, 19 Torrington Place

Module Overview

This module covers the problems faced by developing countries and the role of the construction industry can potentially play engendering economic development.

Aim, Learning Objectives & Learning Outcomes

Aims:	The module aims to introduce students to the basic concepts, methods and tools used in development economics to both appreciate the constraints that stop economies from realising their full potential and the role construction of infrastructure can play in loosening those constraints.
Learning Objectives	The students will learn the basic neoclassical growth model and dualism model of economic development. Within these two frameworks, they will learn the role railways, roads and other large infrastructure projects can play making markets more accessible and engendering the process of economic development. The course will expose the students to both the academic literature and real-world examples of transformative infrastructure projects that have changed the course of history in developing countries.
Learning Outcomes	At the end of the course the students will have a greater appreciation of the problems in economic development and the role construction of infrastructure can play engendering economic development across the world, both in developing and developed countries.

Teaching Schedule

<i>Week</i>	<i>Session</i>	<i>Topic</i>	<i>Readings</i>	<i>Lecturer</i>
26	1	Growth Facts and Solow Growth Model		Dr. Aniket
27	2	Solow Growth Model, Part II		Dr. Aniket
